

Notes	Evidence	Score
Workload is spread over the whole team (one team member is often Xtimes more productive than the others... --	<a href="https://github.com/RishithaRamesh/wolfcafeplus/commits/main/">https://github.com/RishithaRamesh/wolfcafeplus/commits/main/</a> - equally distributed.	3
but nevertheless, here is a track record that everyone is contributing a lot)	<a href="#">We worked on code, planning, poster, testing</a>	3
Number of commits	<a href="https://github.com/RishithaRamesh/wolfcafeplus/pulse">https://github.com/RishithaRamesh/wolfcafeplus/pulse</a>	3
Number of commits: by different people	<a href="https://github.com/RishithaRamesh/wolfcafeplus/pulse">https://github.com/RishithaRamesh/wolfcafeplus/pulse</a>	3
Issues reports: there are many	<a href="https://github.com/RishithaRamesh/wolfcafeplus/issues">https://github.com/RishithaRamesh/wolfcafeplus/issues</a>	3
Issues are being closed	<a href="https://github.com/RishithaRamesh/wolfcafeplus/issues">https://github.com/RishithaRamesh/wolfcafeplus/issues</a>	3
Docs: doco generated, format not ugly	in GitHub main page of our repo - <a href="https://github.com/RishithaRamesh/wolfcafeplus">https://github.com/RishithaRamesh/wolfcafeplus</a>	3
Docs: what: point descriptions of each class/function (in isolation)	In various pull requests and commit descriptions	3
Docs: how: for common use cases X,Y,Z mini-tutorials showing worked examples on how to do X,Y,Z	<a href="https://github.com/RishithaRamesh/wolfcafeplus/blob/main/API_DOCUMENTATION.md">https://github.com/RishithaRamesh/wolfcafeplus/blob/main/API_DOCUMENTATION.md</a>	3
Docs: why: docs tell a story, motivate the whole thing, deliver a punchline that makes you want to rush out and use the thing	<a href="https://github.com/RishithaRamesh/wolfcafeplus/blob/main/README.md">https://github.com/RishithaRamesh/wolfcafeplus/blob/main/README.md</a>	3
Docs: short video, animated, hosted on your repo. That convinces people why they want to work on your code.	<a href="https://github.com/RishithaRamesh/wolfcafeplus/blob/v1.1.0/Project%20Demo.mp4">https://github.com/RishithaRamesh/wolfcafeplus/blob/v1.1.0/Project%20Demo.mp4</a>	3
Use of version control tools	We Git for version control, hosted on GitHub. All commits, branches (e.g., main, release), and pull requests are tracked, with automated CI/CD workflows triggered on each push. The repository history clearly documents development progress, collaboration, and versioned releases.	3
Test cases exist	Codecov Badge Added. test cases code coverage is more than 70% of the code base	3
Test cases are routinely executed	We set up github workflows	3
Issues are discussed before they are closed	<a href="https://github.com/RishithaRamesh/wolfcafeplus/discussions">https://github.com/RishithaRamesh/wolfcafeplus/discussions</a>	3
Chat channel: exists	<a href="https://github.com/RishithaRamesh/wolfcafeplus/discussions">https://github.com/RishithaRamesh/wolfcafeplus/discussions</a> + we all live in the same house. In person collaboration(Check cell D17) + Whatsapp Chats.	3
Test cases: a large proportion of the issues related to handling failing cases.	If a test case fails, open an issue and fix it - <a href="https://github.com/RishithaRamesh/wolfcafeplus/issues">https://github.com/RishithaRamesh/wolfcafeplus/issues</a>	3
Evidence that the whole team is using the same tools: everyone can get to all tools and files	<a href="https://github.com/RishithaRamesh/wolfcafeplus/graphs/code-frequency">https://github.com/RishithaRamesh/wolfcafeplus/graphs/code-frequency</a> The entire team collaborates using the shared GitHub repository, where all source code, configuration files, documentation, and workflows are accessible. Each member uses the same MERN stack tools (MongoDB, Express, React, Node.js), with consistent setup instructions provided in INSTALL.md. This ensures every team member can clone, build, test, and deploy the project using the same environment and toolchain.	3
Evidence that the whole team is using the same tools (e.g. config files in the repo, updated by lots of different people)	Commits added by one person, fetched by another and pushed a merge etc.	3
Evidence that the whole team is using the same tools (e.g. tutor can ask anyone to share screen, they demonstrate the system running on their computer)	Commits added by one person, fetched by another and pushed a merge etc.	3
Evidence that the members of the team are working across multiple places in the code base	Different branches being committed and merged after reviewing pull requests.	3
Short release cycles	<a href="https://github.com/RishithaRamesh/wolfcafeplus">https://github.com/RishithaRamesh/wolfcafeplus</a>	3
The file .gitignore lists what files should not be saved to the repo. See <a href="#">examples</a>	We do not push .env and other files added in .gitignore	3
The file INSTALL.md lists how to install the code	<a href="https://github.com/RishithaRamesh/wolfcafeplus/blob/main/INSTALL.md">https://github.com/RishithaRamesh/wolfcafeplus/blob/main/INSTALL.md</a>	3
The file LICENSE.md lists rules of usage for this repo	<a href="https://github.com/RishithaRamesh/wolfcafeplus/blob/main/LICENSE.md">https://github.com/RishithaRamesh/wolfcafeplus/blob/main/LICENSE.md</a>	3
The file CODE-OF-CONDUCT.md lists rules of behavior for this repo; e.g. see <a href="#">example</a>	<a href="https://github.com/RishithaRamesh/wolfcafeplus/blob/main/CODE_OF_CONDUCT.md">https://github.com/RishithaRamesh/wolfcafeplus/blob/main/CODE_OF_CONDUCT.md</a>	3
The file CONTRIBUTING.md lists coding standards and lots of tips on how to extend the system without screwing things up; e.g. see <a href="#">example</a>	<a href="https://github.com/RishithaRamesh/wolfcafeplus/blob/main/Contributing.md">https://github.com/RishithaRamesh/wolfcafeplus/blob/main/Contributing.md</a>	3
The file README.md contains all the following	<a href="https://github.com/RishithaRamesh/wolfcafeplus/blob/main/README.md">https://github.com/RishithaRamesh/wolfcafeplus/blob/main/README.md</a>	3
Video	<a href="https://github.com/RishithaRamesh/wolfcafeplus/blob/v1.1.0/Project%20Demo.mp4">https://github.com/RishithaRamesh/wolfcafeplus/blob/v1.1.0/Project%20Demo.mp4</a>	3
DOI badge: exists. To get a Digital Object Identifier, register the project at <a href="#">Zenodo</a> . DOI badges look like this:	Badge present: DOI	3
Badges showing your style checkers	Badge present: Lint Check — passing	3
Badges showing your code formatters.	Badge present: code style: prettier and formatter: Prettier	3
Badges showing your syntax checkers.	Badge present: Build & Test — passing	3
Badges showing your code coverage tools	Badge present: Codecov badge - 700%	3

Badges showing any other Other automated analysis tools	config files in GH, badges in README	3
